PROFILE

Full-stack developer passionate about building scalable, user-centric web applications. Experienced in developing and deploying production applications with modern tech stacks. Proven ability to integrate complex backend systems, optimize frontend experiences, and deliver real business impact. Currently building with Next.js, TypeScript, Node.js, React, and cloud technologies. Seeking to deepen expertise in fintech and system design.

WORK EXPERIENCE

Full Stack Developer

12/2024 – Present

Unsung Music

Hybrid

- Architected and deployed a comprehensive artist services platform serving 2000+ active users within 2 months of launch, enabling independent artists to distribute music and manage their careers.
- Designed and built responsive frontend using Next.js, TypeScript, React, and Tailwind CSS, resulting in seamless user experience across devices.
- Integrated Flutterwave payment gateway, enabling secure music distribution and payment processing for artists and customers
- Developed scalable backend APIs using Node.js and REST architecture to handle artist onboarding, music uploads, playlist management, and transaction processing.
- Managed PostgreSQL and MongoDB databases to ensure data integrity and efficient querying across millions of user interactions.
- Result: Platform reached 2000+ active users in 2 months, with payment integration enabling artists to monetize content immediately.

Full Stack Developer

10/2024 – 07/2025

Akinsmarble Enterprises

Remote

- Developed and deployed e-commerce website showcasing marble and design products with intuitive product browsing and filtering.
- Engineered secure payment integration enabling customers to purchase products with confidence, directly increasing sales conversion.
- Built backend using Node.js and TypeScript, ensuring type safety and maintainable code across payment workflows.
- Result: Payment integration boosted sales and enabled the business to display expanded product inventory, increasing customer reach.

EDUCATION

Bachelor of Technology in Industrial Chemistry

01/2017 – 04/2022

Olusegun Agagu University of Science and Technology

Ondo, Nigeria

Advanced Frontend Development –

ALX

- Advanced Frontend Development –fundamentals
- Frontend, Backend, DevOps, Product Management, Technical writing basics
- Next.js, TypeScript, JavaScript, HTML/CSS, Tailwind CSS, Design System
- Extensive study of the internet and how it works.

Design Systems Course

Coursera

FullStack development with SQL and Django

SKILLS

JavaScript

Typescript, NodeJS, NestJS, Express, ES6, React, NextJS, jQuery

Python

Django

Frontend Development

TypeScript, NextJS, React, SASS/SCSS, TailwindCSS, Bootstrap, Redux, HTML and CSS

Backend Development

Python, NodeJS, TypeScript, Express, Django, SQL, NoSQL

devOps

Kubernetes, Docker, AWS, Vercel, CircleCI, Github

AI Tools

GitHub Copilot and , AI Agents

LANGUAGES

English

Yoruba

CERTIFICATES

- Advanced Frontend Development

PROJECTS

CareBridge

Healthcare Platform

07/2024 – Present

- Engineered backend infrastructure for patient-hospital connectivity platform that captures vital signs and routes patients to nearest healthcare facilities
- Designed a backend system that processed and verified information of users
- Integrated data collection systems to ensure accurate patient health metrics are transmitted securely to hospitals.
- Continuously enhanced and maintained all backend systems to ensure stability
- Currently deployed in hospital environments for patient intake and real-time health monitoring.

Tee-Gym

Fitness Platform

11/2024 – 12/2025

- Restructured and integrated backend systems for gym management platform built with CMS.
- Optimized database queries and API endpoints for improved performance and reliability..
